### **Election of Species**

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

(a) Power train arrangements:

Species I, figures 1a and 1b;  
Species II, figures 1c and 15;  
Species III, figures 1d and 23;  
Species IV, figure 14;  
Species V, figures 16 and 17;  
Species VI, figure 22;

(b) Rotary Transfer devices, sub-species usable with the above species:

Species VII, figure 2;  
Species VIII, figure 3;  
Species IX, figure 4;  
Species X, figures 5 and 18;  
Species XI, figure 6;  
Species XII, figure 7;  
Species XIII, figure 8;  
Species XIV, figure 9;  
Species XV, figure 10;  
Species XVI, figure 11;  
Species XVII, figures 12 and 13;  
Species XVIII, figure 19; and  
Species XIX, figure 20, appearing to be usable with species II.

Art Unit: 3618

Applicant is required, in reply to this action, to elect a single species and associated sub-species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Currently, independent claim 1 appears to be generic

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each of Species I-VI are directed to patentably distinct arrangements of vehicle power trains involving significantly different arrangements of operating elements. Each of Sub-Species VII-XIX are directed to patentably distinct embodiments of rotary transfer devices having significantly different constructions and operating elements.
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
4. The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 3618.
